

Z-CODE IDENTIFIERS

Effective Date: Immediate
Notification Date: January 3, 2017

Z-Code Identifiers for molecular diagnostic tests performed by The Medical Foundation and our reference laboratory partners are available through the McKesson Diagnostics Exchange (DEX). The terms of use limit how these codes may be shared. Publication of the codes in marketing materials and on public websites is expressly prohibited.

To obtain the codes:

- Go to <http://mckessondex.com/>
- Click on the orange “Log In” button in the upper right corner of the screen
- Click on the “Register as a Lab or Manufacturer” button and follow the instructions to register
- Once registered, login to the DEX and select the option to browse the catalog by Labs & Manufacturers
- Enter “South Bend” in the keyword search and you will find our laboratory
- Click on the laboratory Title to pull up our profile and the list of tests we have registered
- From our profile page, click on the “Request Sharing” button to be granted access to our Z-codes

TMF has our DEX account set to Global Sharing so any client lab that requests sharing should get automatic approval.

Our profile only includes tests performed in our laboratory. If you need the Z-Code for a test referred outside TMF, you will need to submit a sharing request to the performing laboratory through the DEX following the same procedure outlined above. You do not need to register again—one user may request sharing with multiple labs and manufacturers.
